Summary

Experienced full-stack developer with over 3 years of expertise in web application development, currently focusing on modernizing legacy applications with React and microservices architecture. Proficient in C#, React, SQL, and skilled in designing scalable front-end and back-end systems. Known for optimizing performance, enhancing security, and delivering user-centric solutions in agile environments.

Professional Experience

EGC Global Services India Pvt. Ltd., Kakkanad, Kerala

Software Engineer

Nov 2021 – Present

- **.NET Development (Nov 2021 – Present):** Developed and maintained high-performance web applications using C#, and SQL, implementing complex UI with Kendo UI and JavaScript for responsive design.
- **React Microservices Migration (Current):** Part of a team responsible for migrating existing applications to a React and microservices-based architecture. Developed modular front-end components, managed API integrations, and optimized application performance and scalability.

Sieva Network Solutions, Trivandrum, Kerala

Business Intelligence Analyst

Jul 2020 – Feb 2021

- Provided technical support and coordinated lead generation activities with the Marketing team to enhance business insights and client engagement.

Projects

Web Service Recommendation using Ethical User Identification

Developed a Python-based recommendation system that suggests optimal web services to users based on trust metrics.

Application Migration to React and Microservices

Contributed to the transition of a legacy .NET application to a React-based microservices architecture, improving maintainability, performance, and scalability.
